

# What's in my bill?

Your bill is composed of four sections: a usage charge for the treatment and delivery of drinking water, the collection and treatment of sewage along with associated environmental services, a service charge covering the costs of metering, billing, customer service, and collection operations, and a storm-water charge for the collection and treatment of all rainwater in the city that flows into our waterways or sewer system.

## Sample of Current Typical Residential Monthly Charges for Homeowners: Inside City

Facilities Charge + Water Usage Charge + Sewer Charge + Stormwater Charge = Monthly Charges

If a customer uses 4,000 gallons of water as measured by the meter, the usage charge would equal:

◆ **Facilities Charge\* for 5/8-inch Meter:** \$23.53

(See table to the top right for monthly facilities charge and usage charge.)

◆ **Water Usage Charge:**

$\$7.454 \times 2 \text{ KGAL} = \$14.91$

(First 2,000 gallons included in facilities charge. Additional 2,000 gallons charged here.)

◆ **Sewer Charges:** Facilities Charge

+ Water Consumption  $\times 0.7315$

= Monthly Charge

$(\$23.53 + \$14.91) \times 0.7315 = \$28.12$

◆ **Stormwater Charge:** \$5.57

(See table to the bottom right for monthly stormwater charge.)

### Total Monthly Bill:

$\$23.53$  (facilities charge) +  $\$14.91$  (water usage charge) +  $\$28.12$  (sewer charge) +  $\$5.57$  (stormwater charge) = **\$72.13**

## Sample of Current Typical Residential Monthly Charges for Homeowners: Outside City

Facilities Charge + Water Usage Charge = Monthly Water Charge\*

If a customer uses 4,000 gallons of water as measured by the meter, the usage charge would equal:

◆ **Facilities Charge\* for 5/8-inch Meter:** \$35.78

(See table to the top right for monthly facilities charge and usage charge.)

◆ **Water Usage Charge:**

\$12.817 x 2 KGAL = \$25.63

(First 2,000 gallons included in facilities charge. Additional 2,000 gallons charged here.)

### Total Monthly Bill:

\$35.78 (facilities charge based on meter size)  
+ \$25.63 (water usage charge for 4,000 gal)  
= **\$61.41**

## How Your Usage is Calculated

The previous month in hundred cubic feet (HCF) is subtracted from the current month. The value is converted from HCF to kilogallons (KGAL) or thousand of gallons. Your bill is based on the converted KGAL total.
